

## Webinar Invitation

### Health Care Professions' Educational Engagement to Support Safer Prescribing and Better Care: An Interprofessional Update on Current Approaches and Future Needs

January 29, 2020  
1:00 – 2:30 pm Eastern Standard Time

Please Join Jim Carroll, Director of National Drug Control Policy, and Admiral Brett Giroir, the Assistant Secretary for Health at the Department of Health and Human Services, and prominent national Education Leaders in this Interactive Webinar

#### Learning Objectives:

- Understand the role of individual practitioners and health care professions' educators in supporting safe prescribing practices
- Understand the federal approach to the National Drug Control Strategy in supporting safe prescribing as well as prevention and treatment for substance use disorders
- Review the diversity and quantity of continuing education approaches underway to help health professionals address the opioid crisis
- Explore how interprofessional collaboratives are evolving educational approaches to address substance use disorder and health professional practice gaps
- Be inspired to develop innovative strategies to anticipate and support unique practice-based needs of prescribers and healthcare workforce

- **Graham McMahan, MD, MMSc**, President and CEO, Accreditation Council for Continuing Medical Education, (ACCME)

## **Background:**

The Office of National Drug Control Policy (ONDCP), with the assistance of the above listed agencies have organized this webinar. ONDCP's Public Health, Education and Treatment Task Force designed this webinar for health care professionals and educators to learn about the National Drug Control Strategy and how the health care community has an important role in safe prescribing education, prevention, and treatment of addiction across all health professions.

The Public Health, Education and Treatment team hopes to utilize this webinar as an opportunity to communicate the Administration's support for safe prescribing practices and the role of the entire health care community in leading the path in both prevention as well as treatment for those who suffer from the chronic disease of addiction.
